Landlords, Property Managers and Agents who manage multiple properties and tenants can sometimes find it difficult keeping track of communications and information about a particular property. Most people use email and excel spread sheets to manage their portfolios, and this can cause disjointed communication and storage of information. SevenBee brings organisation, keeping everyone in the loop. Our entry target customers are professional landlords with 2 to 5 properties or property managers/agents with 15+ properties under management.

The Private Rented Sector is now home to 4.9 million households (Tenants) in the UK, which has more than doubled since 2001 and is now the second largest housing tenure. (English Housing Survey, 2017)

HM Revenue & Customs showed 1.75 million people (Landlords) declared income from property in 2013-2014. Rented from Housing Associations and Local Authorities, stand at 2.8million households and 2.2million households (Tenants) respectfully. (DCLG, 2016)

SevenBee brings all your messages, files, tenants, and tasks to one place. Our platform creates shared understanding between all parties - making it easier to keep everyone in the loop and track related conversations.

Landlords will enjoy having all the day-to-day communications relating to their properties in one place, well organized, secured and easily accessible.

Tenants will enjoy being able to quickly and easily communicate with their landlords about issues they may be having with their tenancy.
